## THE USSHER SOCIETY

---

Chairman                      Dr. W. R. Dearman

Vice-Chairman              Mr. G. Bisson

Secretary                     Dr. C. T. Scrutton

Treasurer                    Dr. P. A. Floyd

Editor                         Dr. E. B. Selwood

Committee members :

Mr. C. M. Bristow

Mr. N. S. Butcher

Dr. R. Goldring

Prof. S. Simpson

Mr. A. H. B. Stride

**Membership** of the Ussher Society is open to all on written application to the Secretary and payment of the annual subscription

**Copies** of this part and Parts 1 to 6 of Volume 1 are available, post free, from the Secretary who can also supply copies of the Bristol **Abstracts** (1960), post free.

**Correspondence** and requests for membership and publications should be addressed to:

Dr. C. T. Scrutton,  
Department of Geology,  
The University,  
Newcastle upon Tyne,  
NE1 7RU.

## CONTENTS

	<i>page</i>
CHAIRMAN'S REPORT.     ...     ...     ...	59
INVITATION ADDRESS. Transgression of the Cretaceous sea in South-West England. By J. M. Hancock.     ...	61
The Cretaceous structure of Great Haldon (Abstract). By E. M. Durrance and R. J. O. Hamblin.     ...     ...	84
The structure of the southern margin of the Bovey Basin (Abstract). By C. M. Bristow and D. E. Hughes.     ...	84
Preliminary results of the mapping of the Bovey Basin (Abstract). By R. A. Edwards.     ...     ...	85
A new interpretation of the Pleistocene succession in the Bristol Channel area (Abstract). By D. Q. Bowen.     ...	86
Post glacial sea level changes in the Bristol Channel (Abstract). By A. B. Hawkins.     ...     ...	86
The problem of the nature, origin and stratigraphical position of the Trebetherick boulder gravel. By B. B. Clarke.     ...	87
The structure of Dawlish Warren. By E. M. Durrance.     ...	91
Corals and stromatoporoids from the Chudleigh Limestone. By C. T. Scrutton.     ...     ...     ...	102
Preliminary results from a borehole in Carboniferous and Devonian sediments near Newton Abbot (Abstract). By B. W. Riddolls.     ...     ...     ...	107
Preliminary report on the Wilsey Down Borehole, North Cornwall (Abstract). By E. C. Freshney.     ...	107
The geology of the Staddon Coast (Abstract). By G. M. Gathercole.     ...     ...     ...     ...	108

Aspects of sedimentology of the Dartmouth and Meadfoot Beds near Fowey, South Cornwall (Abstract). By P. H. Bridges.                   ...                   ...                   ...                   ...	109
Observations on the deposition of the Bude Sandstones (Abstract). By R. V. Burne.                   ...                   ...	109
Limulid undertracks and their sedimentological implications in the Bude Sandstone (Abstract). By R. Goldring. ...	110
The sedimentological history of the Padstow area, North Cornwall (Abstract). By M. Tucker.                   ...                   ...	111
Facies interpretations in the New Red Sandstone, S.W. England (Abstract). By D. J. C. Laming.                   ...                   ...	111
Tergiversate folds from South-West England. By W. R. Dearman.                   ...                   ...                   ...                   ...	112
On the association of upright and recumbent folds on the southern margin of the Carboniferous synclinorium of Devonshire and North Cornwall. By W. R. Dearman.	115
Superposed cleavages in the Middle Devonian slates at Booby's Bay, Padstow, North Cornwall (Abstract). By W. R. Dearman.                   ...                   ...                   ...                   ...	122
Unroofing of the Dartmoor granite and possible consequences with regard to mineralisation. By J. Dangerfield and J. R. Hawkes.                   ...                   ...                   ...                   ...	122
The cordierite-cummingtonite-anthophyllite-rocks of Land's End. By J. R. Hawkes.                   ...                   ...                   ...	132
The geochemistry of the Cligga granite. By A. Hall.                   ...                   ...	136

The following papers were also read :

Par Beach exploration. By A. D. Francis.

Chemical analysis of the dolerites and associated rocks of the  
middle Teign valley. By J. A. Chesher.
